

### **AMENDMENT TO THE SPECIFICATION**

At page 4, line 23, add the following paragraph:

Figs. 10 and 10A is an illustration of one embodiment of the cap and corresponding valve. Fig. 10 shows a spout that projects from one side thereof upwardly, the spout is formed integrally with the cap and includes a front and rear walls that converge to an outwardly protruding tip of the spout. Fig. 10A shows a cross-sectional view of the cap showing a valve incorporated into the spout wherein the valve substantially prevents a liquid from leaking out of the spout.
